

Rocketbuster Boots USA

115 Anthony Street
El Paso, Texas 79901

Phone: 915-541-1300

Web Address: www.rocketbuster.com

Our phone hours are Monday - Friday 8:00 am - 4:00 pm MST. Please **DO NOT** hesitate to call if you need help with this form (It's easier than it looks!)

email: howdy@rocketbuster.com

INSTRUCTIONS

Troubleshooting: Please help us with these specifics to enable a better fit.

★ Do you have trouble getting into shoes or boots? (This would indicate a high instep)
☐ Yes ☐ No Explain _____

★ ARE YOUR FEET?

☐ Narrow ☐ Normal ☐ Wide

★ Please indicate the location of any injuries, corns, bunions, broken toes, or other sensitive spots that might need special consideration. _____

(You can indicate these spots on your tracing with a ★)

★ **Shoe Size (IMPORTANT!** This is the reference point upon which all measurements are compared)

☐ Men's ☐ Ladies

While standing in socked feet evenly distribute your weight with one foot on the paper directly on top of the dotted line (1). Make sure your complete foot is on the paper so the pencil does not run off the edge). If you make mistake use a different color pencil and indicate which line is correct. Trace yourself or enlist the help of a friend. Hold the pencil perpendicular to the ground and outline the foot all the way around. **DO NOT tilt the pencil** (2) when you have outlined the entire foot you may tilt to the inside of the foot to indicate the arch placement (3). Congratulations you have traced your first foot! Now slide the paper over and trace the other. After completing the outlines of your feet take a soft tape measure and begin your measurements. For each of these measurements the tape goes completely around the foot.

(NOT from side to side)

Ball: The widest part at the front of your foot (4).

Waist: Under the arch and around to the top of your foot (5).

Instep: Hook the tape under the heel and bring it around to the front of the instep (some people have a pronounced bone at this point) (6).

Heel: Hook the tape under the heel and round to the front to the ankle (7).

Calf @ 12" Up: Measure up your leg 12" from the ground and around your calf. (This measurement is very important. Most boots are 12" tall, this measurement indicates how well they will fit your leg) (8).

Largest Part of Calf: This will be two measurements. First, how high up from the ground is the largest part of your calf? Second, what is the circumference? (9)

Repeat These Measurements For Both Feet

Signature: When you are finished, please sign to confirm all details for your design.

X _____

Date: _____

One final measurement, how tall do you want your boot?
Standing barefoot on the floor, measure from the floor to the spot on your leg that is the height you desire.
Then measure the circumference at that point.

MEDALLION STYLES

Please fill in a stitching color choice below. For the "Longhorn" style, you will need to choose two colors inside and out.
